Thank you to reviewers of negative results in 2015

David Alcántara

Editor in Chief, The All Results Journals:Biol

The mission of *The All Results Journals:Biol* is the communication of excellent research work obtaining negative results from all fields of biology and biomedicine. Clearly, a scientific journal's greatest responsibility toward the scientific community is to ensure that all contributions accepted for publication are rigorously but fairly reviewed, specially in a journal of negative results like this. For this reason, all manuscripts published in the journal are reviewed by expert referees. To be fair with authors and reviewers we decided to use double blind peer-review process since our first issue. The final quality of papers accepted for publication depends to a considerable extent on the reviewers, who give valuable constructive criticism to the authors. The input and dedication of all our reviewers are highly appreciated by both the editors and the authors.

At the end of 2015, we gratefully acknowledge the valuable support of the following scientists who have reviewed papers for the journal during the past 12 months:

Amit Misra

Carlos Juan Ceacero Ruiz

Chima Ngumah

D. Nagasamy Venkatesh

Girish Mahajan

Hamideh Ofoghi

Mehdi Mohebodini

Maria Pilar Ayuda Durán

Nicolas Navrot

Saurabh GhoshRoy

Valeria Righi
